C WAN MUHAMMAD NAWAWI

Multimedia Computing Student

+60 11-3919 0855 | kerjanawawi@gmail.com | Kemaman,Terengganu

PROFILE

Final-year Multimedia Computing undergraduate at UiTM Shah Alam specializing in game development, mobile programming, and 3D modeling. Skilled in Unity, C++, Java, and Blender. Seeking a technical internship to apply software engineering skills to real-world interactive projects.

EDUCATION

UiTM Shah Alam
2025-2027

Bachelor of Computer Science (Hons.) Multimedia Computing

- Current CGPA: 3.69
- Relevant Coursework: Data Structures, Enterprise Programming, Game Programming and Computer Graphics.

UiTM Kuala Terengganu
2022-2025

Diploma in Computer Science

- Final CGPA: 3.80
- Awards: Anugerah Naib Canselor (ANC)

SMK Mak Lagam
2017-2021

Sijil Pelajaran Malaysia (SPM)

- Obtained 5As for 2021 SPM

WORK EXPERIENCE

Noor Arfa Sdn Bhd
September 2024-February 2025

Database & Automation Officer Internship

- Managed and optimized the customer database to ensure data accuracy and streamline daily operations.
- Designed and maintained promotional landing pages to drive engagement for marketing campaigns.
- Automated customer communications by scheduling targeted WhatsApp broadcast campaigns for promotions.

ShopeeFood
November 2024-Present

Delivery Partner

- Collects food and beverage orders from merchant partners and delivers them safely and promptly to customers using my personal motorcycle

EXTRACURRICULAR ACTIVITIES

UiTM Kuala Terengganu
2024

College Band Guitarist | UiTM College Festivals (2024)

- Collaborated closely with band members to rehearse and execute live musical performances for large college events.
- Managed technical audio setups, including configuring digital effects processors and amplifiers for optimal live sound quality.

COMPUTER SKILLS

- Programming & Web Languages: Python, C++, Java, HTML, CSS, MySQL
- Development Tools & Engines: Unity, Construct 2, Android Studio
- Multimedia & Design Software: Blender, Canva, CapCut, Alight Motion, Adobe Photoshop, Adobe Illustrator
- Productivity & Data Management: Microsoft Excel, Google Sheets

FEATURED PROJECTS

G-Coach | Interactive Guitar Tutoring App (Java, Android Studio)

- Developed an audio-based mobile application centered around a note-matching game to help guitarists map the fretboard and overcome "fretboard blindness."
- Integrated the TarsosDSP library for real-time digital signal processing, enabling precise pitch tracking, tuning capabilities, and interactive feedback during gameplay.

Kubur Run: Escape The Jin | 2D Endless Run Game (Construct 2)

- Designed and developed a 2D survival endless runner game inspired by Malaysian folklore using Construct 2.
- Programmed core gameplay mechanics, including escalating difficulty curves, dynamic hazard dodging, and interactive power-up management.

MYR Currency Recognition AI | Computer Vision (Python, Keras)

- Built and trained a machine learning computer vision model to accurately detect and classify Malaysian Ringgit (MYR) banknotes.
- Engineered a custom training pipeline and developed an interactive Graphical User Interface (GUI) to process real-time inference using Python and Keras.
